INTRODUCTION

The annual Criminal Justice Profile series summarizes and combines data pertaining to California's criminal justice system. Separate publications are available for each county and the state. Much of the data presented in the Statewide Profile supplements the Bureau of Criminal Statistics' (BCS) annual Crime and Delinquency publication, which is available upon request. Data not provided in these publications may be available from BCS by special request.

Each Profile consists of two sections. The first section displays annual criminal justice data in tabular form for 1980 through 1989. The second section contains reference tables displaying selected data for 1989.

CRIMINAL JUSTICE DATA

Trend data in the Profile are reported to BCS by state and local agencies and have been summarized for each year. Individual county or statewide totals for selected criminal justice activities are provided in tabular form in this section. Tables are provided on crimes, arrests, processes, personnel, expenditures, and correctional actions.

Where used, population data are shown in hundreds and can be converted to original numbers by adding two zeros. For example, the state population for 1989 is shown as 290,632, which converts to a population total of 29,063,200.

REFERENCE TABLES

The individual reference tables in this section cover data for 1989 on crimes reported, adult and juvenile arrests, prosecution, and adult and juvenile probation.

Each county publication contains jurisdictional data. The statewide publication relates to California counties.

CRIMINAL JUSTICE DATA FOOTNOTES

1 Homicide arrests from 1981 to 1985 are inflated to some degree. Assault with intent to commit murder is included in some cases because of a 1981 law that repealed Penal Code Section 217.

2 Due to a 1982 law change, arrests for driving under the influence of a drug have been removed from the drug law violations category and are included in the "driving under the influence" category.

In the 1983 "other drug law violations" category, agency reporting problems account for almost all of the recorded increase.

3 Caseload count taken December 31 of each year. Diversion cases are not included.

4 Adult Probation: Removals exclude the "all other" category, which includes deceased, transferred to another county, sentence vacated, and appeal approved. Terminations and violations are shown both numerically and as a percent of total removals.

Juvenile Probation: Prior to 1982, initial referrals with prior status of 654 W&I were counted as new referrals. In 1982 and subsequent years, these will be counted as subsequent petitions filed. Subsequent petitions filed include all cases dismissed, transferred, or remanded to adult court.

In 1988, the Los Angeles County Probation Department began reporting data in a new format to correspond with the rest of the state. This new system is more comprehensive and includes new data elements not reported in the old system.

Due to changes in reporting standards, cases removed from probation are no longer reported.

5 Totals have been rounded and are shown in thousands. Expenditures include salaries and employee benefits, services, and supplies. Building construction is not included. Expenditure and personnel data are not comparable with each other. In 1985, the State Controller's Office revised its method of data collection which impacted various subcategories. Expenditures for state agencies are shown only in the Statewide Criminal Justice Profile.

6 Includes all other expenditures as reported to the State Controller's Office.

7 In 1985, a survey form was developed by the Bureau of Criminal Statistics to collect probation department data. Because of the new data collection method, additional classifications may be included in the "all other" category.

In 1985, the "Number of Full-Time Law Enforcement Employees" reporting form was revised. This may result in a decrease in the reported number of full-time law enforcement personnel for 1985-1987 in comparison with previous years. One day counts of personnel were taken June 30 with the exception of police departments, sheriffs' departments, California Highway Patrol, and University of California Police which were taken October 31. Probation personnel counts were taken January 1, 1990. The dates varied in previous years. The fluctuation in 1988 and 1989 sheriff personnel is the result of the exclusion and subsequent inclusion of custodial personnel. Personnel and expenditure data are not comparable with each other. Personnel for state agencies are shown only in the Statewide Criminal Justice Profile.

8 Counts for county and city jails and camps and juvenile nonsecure and secure facilities were taken the fourth Thursday in September of each year. Counts for active adult and juvenile probation caseloads were taken December 31 of each year.

In 1986, the Bureau of Criminal Statistics developed a new one-day survey form to collect juvenile probation caseload counts. (See footnote 4.)

9 Population at risk consists of that portion of the population, who because of like characteristics to the specific study group are considered "at risk." For example, when studying juvenile arrestees, all persons between 10 and 17 years of age would be the "at risk" population. Population at risk is expressed in hundreds.

Notes: To maintain consistency with prior years' data, the arson crimes reported are excluded from the FBI Crime Index trend data (page 5), however 1989 arson crimes reported are included in the reference table (page 21).

Rates on California Crime Index offenses, clearances, and arrests are not computed where population is less than 100,000.

Rates may not balance because of rounding.

Percents may not total 100.0 because of rounding.

Percent distributions are not calculated when the total number upon which those percents are based is less than 50. This does not apply to clearance rates on the California Crime Index offenses.

KNOWN DATA LIMITATIONS AND CHARACTERISTICS

CRIMES

- Tulelake Police Department did not report data for January through December 1989.
- Imperial County Sheriff's Department did not report data for January through December 1989.

ARRESTS

Arrest and Citation Register

- The analysis of race/ethnic data must be considered in light of the subjectivity of the labeling process and classification changes, such as those of the U.S. Bureau of the Census (1980).
- Felony arrest counts may include some misdemeanor warrants for felony offenses.
- Agency reporting problems account for almost all of the increase recorded in 1983 other drug law violations.
- Through September 1988, law enforcement dispositions of adult arrests for Oakland Police Department do not accurately reflect disposition actions taken by that agency. Since Oakland accounts for approximately three percent of the arrests in California, the impact on statewide law enforcement dispositions is minimal.
- Tulelake Police Department did not report data for January through December 1989.
- San Bernardino Police Department did not report data for January through December 1989.

ADULT FELONY ARREST DISPOSITIONS

Offender-Based Transaction Statistics System

- OBTS statistical data are taken directly from the state's Automated Criminal History System (ACHS). Most arrests are entered to ACHS from the fingerprint card, while most dispositions are entered from the "Disposition of Arrest and Court Action" form (JUS 8715).
- These data reflect 1989 dispositions resulting from adult felony arrests which were made in 1989 or before. There is an important difference between the arrest data reported to the Bureau of Criminal Statistics and Special Services (BCS/SS) and OBTS data. Arrest data are grouped by the year in which the arrest took place. OBTS data are grouped by the year of disposition regardless of the year in which the arrest occurred.
- These data do not represent the total number of adult felony arrest dispositions that occurred during 1989. For example, thousands of adult felony arrests are disposed of by revoking the arrestee's probation or parole status in lieu of filing charges on the new arrest. These new arrest offense dispositions may not have been reported as a final disposition on the JUS 8715 form. Any subsequent actions or arrestees who are turned over to other states or federal jurisdictions are not included in OBTS data. It is estimated that, at the statewide level, 40 percent of the adult felony arrests which were reported to BCS/SS by law enforcement agencies on the Monthly Arrest and Citation Register were not reported on the JUS 8715 form. In spite of this underreporting, the arrest dispositions received generally describe "statewide" processing of adult felony arrestees through California's criminal justice system. However, comparisons of county and local data should be made with caution since the level of reporting may vary between jurisdictions and from year to year.
- If a person is arrested for multiple offenses, OBTS selects only the most serious offense, based on the severity of possible punishment. If there are multiple court dispositions, OBTS selects the most serious court disposition and the associated offense.
- OBTS data on state institutional commitments may vary from information compiled and reported by other state agencies because of differences in the data collection systems. For example, the Department of Corrections (CDC) counts the number of defendants actually received in CDC institutions, even though a defendant may have been convicted and sentenced in two or more counties. OBTS counts each commitment.
- The adult felony arrest disposition file for 1989 includes 206 persons whose age at disposition was under 18. These minors received a final disposition in adult court under provision of the Welfare and Institutions Code, Sections 707 and 707.1.

ADULT PROBATION

- The data include adults placed on supervised probation only. Court probation, diversion, and summary probation are not included.
- Persons are counted once for each jurisdiction. Thus, data include original grants of probation and do not include subsequent grants of probation to persons already under probation supervision ordered by the same level court in the same county. Also, the probationers under jurisdiction of both superior and lower courts and any who are jurisdictional cases of more than one county are counted more than one time in statewide totals.
- The sources of data are county probation departments' monthly reports of summary data.

JUVENILE PROBATION

- In cases where a juvenile has multiple petitions filed for more than one offense, only the petition with the most serious offense is recorded. This accounts for the differences between BCS counts and the statistics generated by the Administrative Office of the Courts, which counts the number of petitions processed.
- In 1986, BCS developed a new one-day survey form to collect juvenile probation caseload counts. Prior to 1986, these data were developed programmatically from transactions reported by probation departments.
- Some probation departments were unable to modify pre-1980 automated reporting programs to include certain types of subsequent referral information. Data are not available for Los Angeles, San Diego, and Santa Clara counties for 1980-1987 and Alameda County for 1980-1984. As trend data become available for each of these counties, they will be included in the subsequent referral data tables and displays.

By congressional mandate, arson was added as the eighth Index offense in 1979." These offenses were chosen on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas of the country, and likelihood of being reported to law enforcement.
